

Press Release

Le Bourget du Lac, 7 September 2009

**3iTECH, RocTOOL's NEW MOLDING BY INDUCTION TECHNOLOGY  
WILL BE PRESENTED AT A WORLD-WIDE PREMIERE AT IMTU 3 ON 27 OCTOBER 2009**

RocTool will be launching **3iTech**, Integrated Internal Induction Technologies, **a new molding by induction technology**. This will be presented at a sneak preview at the third Innovative Molding Technologies Update, IMTU 3, 27 October 2009, with live demonstrations.

This patented technology completes that of the Cage System® and opens the door for RocTool to new applications and serial production.

IMTU 3 will be held at Savoie Technolac in Le Bourget du Lac, and offers you to discover 3iTech through the testimonies and experience from three different companies, technical presentations and exclusive live « demos ».

Discover the complete IMTU 3 program and register for this exciting event

**More about RocTool**

Since its creation in 2000, **RocTool develops innovative processes for rapid material molding by induction**. Twice winner of the JEC Composites Awards, the company has sold over a dozen licenses of its patented technology of heating by induction, the Cage System®, predominantly for Composite applications of medium to large series. **RocTool was listed on the Stock Exchange « Nyse Euronext Marché Libre de Paris » in 2008**. Its headquarters and R & D centre are situated at Savoie Technolac at Le Bourget du Lac and two sales offices are open in Atlanta (USA) and Tokyo (JAP).
