Strengthening the organization to accelerate international development

Roctool (Euronext Growth – FR0010523167 – ALROC), specialists in heating and cooling technologies for plastics and composite molds, announces the appointment of José Feigenblum as Chief Operating Officer (COO) and his entry onto the Board of Directors.

A redesigned organization to enhance efficiency

Since late 2025, Roctool has initiated an evolution of its organization to accelerate its development and strengthen its competitiveness. This transformation is built around three priorities:

- **Strengthening** customer and key **account management in strategic segments**,
- **Accelerating project execution** and operational performance,
- **Reducing costs** and optimizing procurement on a global scale.

To lead these key initiatives, José Feigenblum was appointed Chief Operating Officer (COO) in early 2026

Mathieu Boulanger, Chief Executive Officer of Roctool, stated: *“Within the framework of the transformation launched by Roctool since late 2025, I wanted to strengthen our operational organization by entrusting José with the leadership of these key initiatives. José has been working with Roctool for many years, and his experience in China and Europe gives him a unique global and operational perspective of the company. His appointment represents an important step in strengthening our productivity, efficiency, and execution capabilities internationally”.*

Strengthened governance and clarified roles

As part of this evolution, José Feigenblum also joins Roctool’s Board of Directors

This appointment reflects the Group’s commitment to strengthening its governance and supporting the ongoing operational transformation. It will enable the Chief Executive Officer to focus even more on overall strategy, the development of key accounts and major clients, industrial partnerships, and relationships with new investors, while relying on the Chief Operating Officer to drive performance and operational execution.

José Feigenblum, Chief Operating Officer, stated: *“This appointment reinforces the mutual trust built over the years with Mathieu Boulanger, as well as our shared vision for Roctool’s development. My role will be to capitalize on my knowledge of the company, its teams, technologies, and customers to support our international expansion, particularly through new strategic opportunities related to our industrial development, and to ensure agile and structured operational decision-making in support of our ambitions.”*

Focus on international growth

At the same time, the Company is launching several initiatives aimed at strengthening its alliances with leading industrial partners in Europe, the United States, and Asia, with a clear objective: to offer a global solution by leveraging existing technological and commercial synergies

Roctool is also preparing to scale up its testing, prototyping, and development activities, with the ambition of deploying its capabilities worldwide through its platforms
